Filed: December 30, 2024

**RULING ON ENTITLEMENT<sup>1</sup>**

On January 29, 2024, Andrew Monroe filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*<sup>2</sup> (the “Vaccine Act”). Petitioner alleges that he suffered a Table injury – Guillain-Barré Syndrome (“GBS”) as a result of his November 27, 2021 influenza (“flu”) vaccination. Petition at ¶¶ 1, 21, 24-25. Petitioner further alleges that he received the vaccine in the United States, that he suffered the residual effects of his injury for more than six months, and that there has been no prior award or settlement of a civil action on his behalf as a result of his injury. See Petition at ¶¶ 1, 23, 26-27. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On December 23, 2024, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent states that

[m]edical personnel at the Division of Injury Compensation Programs, Department of Health and Human Services, have reviewed the petition and medical records filed in the case. It is [R]espondent's position that petitioner has satisfied the criteria set forth in the Vaccine Injury Table and the Qualifications and Aids to Interpretation, which afford petitioner a presumption of causation if the onset of GBS occurs between three and forty-two days after a seasonal flu vaccination and there is not preponderant evidence of an alternative cause.

*Id.* at 7 (citing 42 C.F.R. § 100.3 (a)(XIV)(D), (c)(15)).

**In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.**

**IT IS SO ORDERED.**
